PERSONAL STAIRCLIMBERS

STANDARD | UNIVERSAL | TRACK

PS STANDARD

THE INDOOR SPECIALIST. Equipped with a comfortable seat and anti-slip rubber-surfaced folding armrests, the Standard Personal Stairclimber is the ideal stairclimber for in and around the house. The compact design of the Standard makes it especially suitable for use on narrow or winding staircases.

PS OUTDOOR

YOUR OUTDOOR COMPANION. Thanks to its sturdy design with extra-large non-marking wheels, a braking system on the inside of the wheel rims and a wider track width, the PS Outdoor is ideal for when you are out and about. And you can easily take your PS Outdoor with you to visit friends and relatives.

PS UNIVERSAL

THE VERSATILE PROFESSIONAL. For self-propelled wheelchairs and transport chairs: simply roll onto the platform and secure in place with the retention clamp (clamp range 330 to 500 mm). Apply the wheelchair brakes, and you are ready to go! Folds away compactly for quick and easy stowage. Also ideal for professional personnel transport.

PS ADAPT

TO FIT TO YOUR WHEELCHAIR. To use the PS Adapt with your own wheelchair, the necessary adapter is fitted by an authorised workshop. **PS Plus** The all-in-one solution consists of PS Adapt and a wheelchair for people weighing up to 125 kg.

PS FOLD

IDEAL FOR MEDICAL TRANSPORT APPLICATIONS Fitted with 200 mm diameter wheels and a track width of 297 mm, the PS Fold is the ideal stairclimber for very steep and narrow winding stairs. By simply folding up the stairclimber the Ps Fold can be stowed in any vehicle. The seat is removable and washable for easy cleaning.

PS TRACK

The PS Track is a mobile unit that has been especially developed for operating on straight steps. Wheelchair users can now move around more freely and helpers no longer need to strain their backs on the stairs. It's so easy - simply release two levers to dismantle the PS Track into two easily portable parts. The PS Track ensures extremely safe handling on the stairs.
